NUCLEAR REGULATORY COMMISSION

[Docket No. 40-3453]

Notice of Issuance of Amendment 26 to Source Material License SUA-917 Amending License Condition (LC) 55 for Atlas Corporation's (Atlas') Uranium Mill Facility at Moab, Utah

AGENCY: Nuclear Regulatory Commission.

ACTION: Amendment 26 to Source Material License SUA-917, issued January 22, 1996, amends LC 55 to show that interim cover placement has been completed.

SUMMARY: By letter dated October 25, 1995, Atlas Corporation (Atlas) submitted a request to amend condition 55 (LC 55) of Source Material License No. SUA-917. LC 55 lists the completion dates for reclamation milestones established as targets in the

Memorandum of Understanding (MOU) with the Environmental Protection Agency (EPA) (56 FR 55432, October 25, 1991). Atlas requested that the license date for completion of placement of the interim cover in LC 55A.(2), be changed from October 31, 1995 to November 30, 1995. By letter dated November 13, 1995, Atlas notified NRC that it completed placement of the cover on November 10, 1995. Atlas' failure to complete the interim cover on the tailings impoundment by October 30, 1995, was due to unanticipated problems in actually placing cover over areas of the pile that had previously been covered by water. Atlas had been placing the interim cover since October 4, 1995, and at the time of its license amendment request, had completed 60 percent of this final phase and 92 percent of the entire pile. On January 22, 1996, the license was amended to show that placement of the interim cover was complete.

FOR FURTHER INFORMATION CONTACT: Myron Fliegel, Office of Nuclear Material Safety and Safeguards, Washington, DC 20555, Telephone: 301-415-6629.

Signed at Rockville, MD, this 30th day of January 1996.

For the U.S. Nuclear Regulatory Commission.

Joseph J. Holonich, Chief,
High-Level Waste and Uranium Recovery Projects Branch, Division of Waste Management, Office of Nuclear Material Safety and Safeguards.
